

CHANGING THE WAY YOU SEE THINGS ONE EYE AT A TIME

When you walk into Blink Eyecare you probably will not feel like you are in for an eye exam. The beautiful soft blue tone on the wall, eclectic design, stonewalls and iron finishes may make you feel more like home. Blink Eyecare is a new type of eye health facility in McKinney where you will find a caring team of eye care professionals dedicated to providing high quality, cutting edge eye care that is personalized for each member of the family. It is the belief of Dr. Kayla Gaddis, O.D. that the more tailored your care is the better your overall eye health will be. At Blink Eyecare Dr. Gaddis and her team take great pride in offering each patient the absolute best in vision care— whether through fitting them with eyeglasses or contact lenses, diagnosing and treating cataracts, glaucoma, and other eye disease, or recommending LASIK and other eye surgery procedures the team at Blink Eyecare takes the time to explain your options and find the best course of treatment for each individual patient.

As a fully licensed and state of the art optometric practice, Blink Eyecare offers a comprehensive range of eye care services that takes the holistic needs of each patient into consideration. Based on a diagnosis of an eye disease Dr. Gaddis can recommend a wide variety of approaches including improved nutrition, prescription medications, therapy and corneal reshaping, or medical procedures. Although many do not realize it, the best way to protect your vision is with yearly eye exams. Even a comprehensive eye exam can instantly detect conditions like diabetes-related injury to the retina or tumors that can threaten your health.

Living up to its slogan statement, “vision driven, style inspired,” Blink Eyecare provides a wide variety of top brand designer frames and sunglasses that are sure to meet each member of the family’s fashion needs. A few of the top designers include Tom Ford, Tiffany, Jimmy Choo, Prada, Gucci and so much more. For the fashion forward patients Dr. Gaddis and her team pair up with various designers to offer first look trunk shows throughout the year that always prove to be a great time.

Growing up in the McKinney and Allen area Dr. Gaddis has a vested interest in the community in which she serves; often spending her time giving back to the community that helped shape her into the professional she is today. As a member of Leadership McKinney, Dr. Gaddis not only volunteers her time at local community events, her practice is also the official eye care provider for the Texas Revolution football team.

At Blink Eyecare the team of eye care professionals is not only dedicated to providing the latest in eye health, but also building lasting relationships with their patients. Dr. Gaddis and her team take extra time to know your vision and lifestyle needs, but most importantly your needs as an individual as well. At Blink Eyecare you’re more than a patient, you’re family.
